Collezione
terre dei borboni

terre dei borboni

Il riferimento evocativo, di uno dei periodi più significativi e rilevanti della nostra storia, si fonde coerentemente con questa nuova collezione, che attraverso i colori della terra e del mare coglie il senso profondo della tradizione mediterranea. Lucidi splendenti come gocce al sole, e rustici, si alternano in più formati rendendo possibili svariate soluzioni applicative per pavimentazioni e rivestimenti interni ed esterni ma sicuramente eleganti e senza tempo.

The evocative reference of one of the most significant and important period of our history, melt with this new collection, that through the colors of the earth and of the sea grasps the deep meaning of the Mediterranean tradition. Bright, shining like the sun drops, and rustic, alternate themselves in many sizes, creating a great variety of solutions for both internal and external wall and floor, but definitely elegant and timeless.
